NICOLA RUSSELL

Bioeffect EGF Radio Frequency & Microcurrent

\$620 | 75 mins

An exclusive combination of Radio Frequency and Microcurrent technology with the Bioeffect Epidermal Growth Factor topical system for skin regenerating luxury.

The blend of collagen stimulating radio frequency with controlled heat and muscle stimulating microcurrent will help to smooth out fine lines and wrinkles, firm, sculpt and tone loose skin on the face and neck. The treatment increases angiogenesis, which is the production of new blood vessels. This delivers oxygen and nutrients to the cells, thus increasing skin health and rejuvenation. This treatment concludes with the Bioeffect Imprinting Hydrogel mask to deliver deep soothing hydration with a relaxing scalp massage.

Oxygen Smooth and Lift

\$525 | 75 mins

Purifying, revitalising, hydrating and brightening, The Natura Bisse Oxygen Line is a complete skincare collection that restores luminosity, evens out skin tone and exceptionally oxygenates to provide skin with energy and freshness.

A burst of oxygen is perfect if your skin feels dull, stressed or jet lagged.

The treatment incorporates steam to cleanse the pores, a muscle lifting massage, lymphatic drainage and nano needling, which is a non-invasive transdermal serum delivery system to infuse the active ingredients into the skin. This treatment concludes with the Oxygen finishing mask and scalp massage.

All prices are quoted in Barbados Dollars and include VAT, 10% Service Charge and Product Levy.

NICOLA RUSSELL

Signature Natura Bisse Dermaplaning

\$390 | 45 mins

As well as being an amazing physical exfoliation (using a little blade to gently remove the outer layer of dead skin), the secondary bonus about this treatment is that it also removes the fine vellus "fluffy" hair. Removing this layer of dead skin and peach fuzz gives you the smoothest skin you have ever had, allowing deeper absorption of our specially selected Natura Bisse skincare, creating a flawless base for makeup and giving a 'glass-like' appearance.

This treatment concludes with a gentle enzymatic peel and LED to leave your skin smooth, bright and red carpet ready.

Bioeffect Power Infusion

\$650 | 60 mins

Powered by Bioeffect with micro needling and ultrasound. This treatment stimulates the production of collagen and elastin through the penetration of thousands of low level superfine needles in the skin, inflicting micro damage.

Ultrasound therapy utilizes high frequency sound waves to penetrate the skin, increasing absorbency to feed the skin with a groundbreaking EGF formula.

A combination of only 12 pure and effective ingredients. The EGF Power Serum was specifically developed to support skin barrier function and brighten the complexion while intensely targeting visible signs of skin ageing. Formulated with a potent blend of growth factors, along with Hyaluronic acid.

All prices are quoted in Barbados Dollars and include VAT, 10% Service Charge and Product Levy.
